Alternative Energy Demystified : 2nd Edition, The ...

2 Alternative Energy Demystified THE JOULE Physicists measure and express energy, regardless of its form, in units called joules. One joule (1 J) is the equivalent of one watt (1 W) of power expended, radiated, or dissipated for one second (1 s) of time. A joule is the equivalent of a watt-second, and a watt is the equivalent of a joule per second. Mathematically:

Vietnam's national grid is ill-equipped to handle the power surge from new renewable energy plants seeking to come online this year. National utility Vietnam Electricity (EVN) has said in a recent report that the construction of new transmission lines might not be able to match the speed of new solar and wind power projects.
