will cover both lectures and reading assignments from C&A. References to WE&C are to provide additional explanatory material for students who lack a strong statistical background.

## **INTRODUCTION TO TEST THEORY**

Test validation is the procedure by which evidence is gathered to determine if test items satisfactorily represent a concept domain and whether the test measures the properties that it proposes to measure (Crocker & Algina 1986). Three types of validity were explored for the LSCI: face validity, content validity, and concurrent validity.
