Into the Cosmos. Book Description: The launch of the Sputnik satellite in October 1957 changed the course of human history. In the span of a few years, Soviets sent the first animal into space, the first man, and the first woman. These events were a direct challenge to the United States and the capitalist model that claimed ownership of scientific aspiration and achievement. The success of the space program captured the hopes and dreams of nearly every Soviet citizen and became a critical ...
