Remove the 12mm nut and the wire on the bolt that goes into the side of the starter motor, gently slide the wire off of the bolt.

Behind the wire will be a 14mm nut, once removed, there will be a metal washer and a plastic spacer, remove these to find a small O ring.

This is a typical Land Rover maintenance project, one which usually does not require spare parts, but which underlines the need for keeping this free of dirt and lubricants. The entire job can be undertaken in under 4 hours, though an overnight is preferable if you want to repaint the starter motor parts.
