International Environmental Law: Development, Principles & Mechanism

International Environmental Law: Development, Principles ...

International environmental law has developed between two apparently contradicting principles. First, states' have sovereign rights over their natural resources. Second, states should not cause damage to the environment. Although the concept of a state's sovereignty over its natural resources is rooted in the old principle of territorial sovereignty, the United Nations General Assembly has further encouraged it declaring,inter alia, that the right of peoples and nations to permanent ...
